Summary of AVM 4 improvements for release

AVM Feature

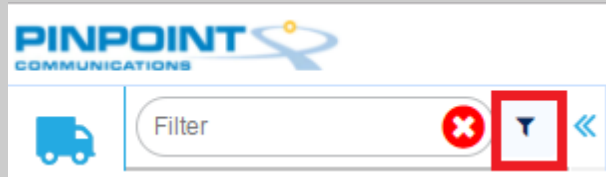

Summary

Tree Filter: Select all/ deselect all

A filter has now been added to Tree menu's excluding the location tree.

This filter can be found on the main page of Web AVM 4 allowing users to select all/deselect all. The new filter will allow customers with larger fleets to have ease of access when trying to locate or report on multiple assets.

The filter can also be found on the tree when generating/ scheduling reports.

Tree Filter: Expand all/ collapse all

In addition to the select all/ deselect the filter also includes expand all/ collapse all.

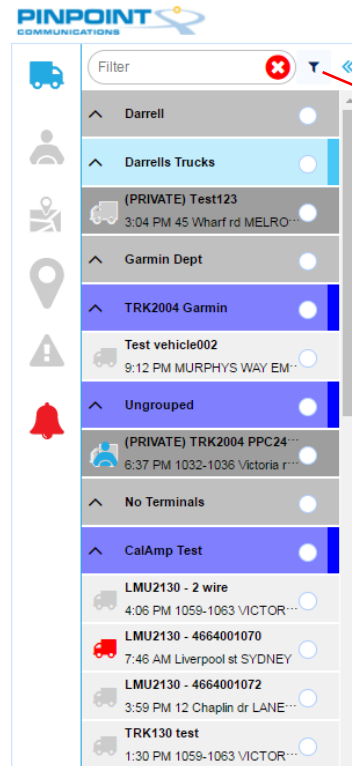

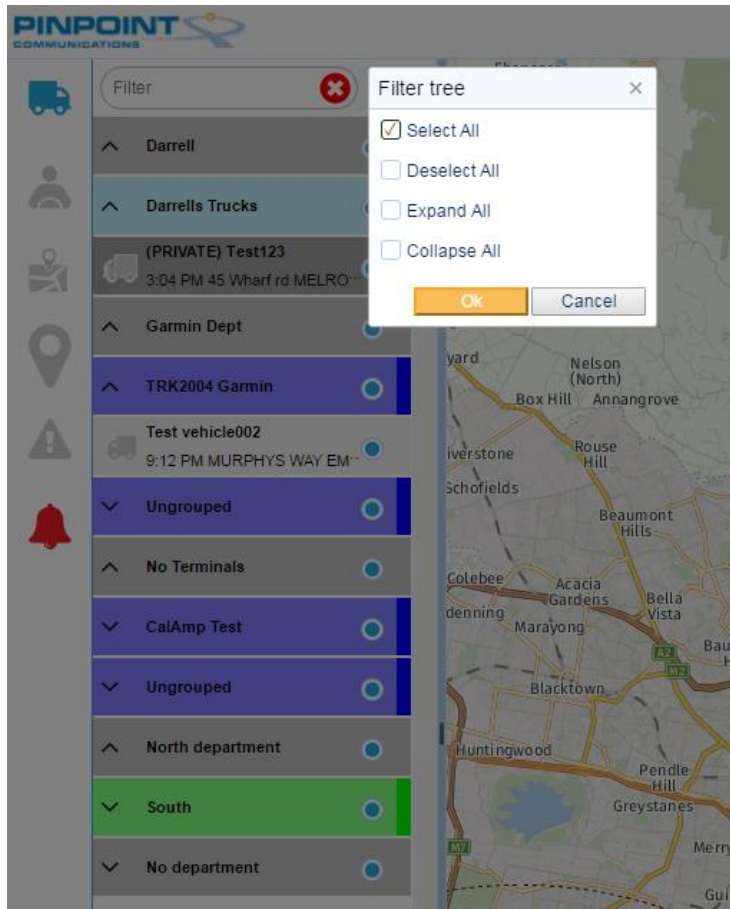

May Release NEW: Tree Filter

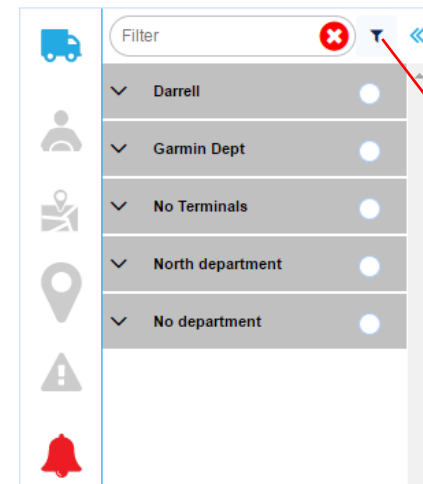

The new tree filter provides the following options to the AVM user:

- **Select All** – selects all the assets in the tree within every department and group.
- **Deselect All** - deselects all the assets in the tree within every department and group.
- **Expand All** - selecting this option will expand the tree view to display all the items within a department or group without selecting the assets.
- **Collapse All** - selecting this option will collapse/ hide the view of the assets within a department or group.

Select all filter view:

Expand All

Collapse All

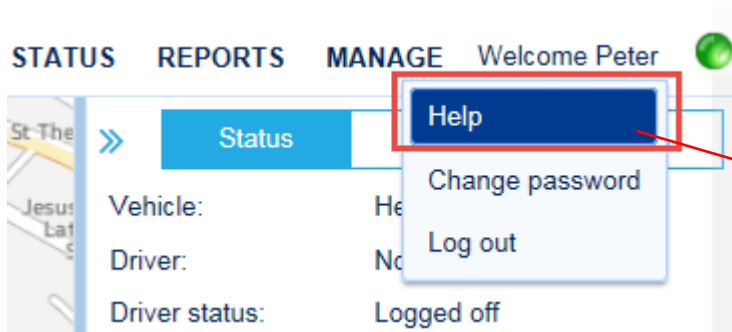

Training will be available weekly online from 30th May, to register for training [“click here”](#)

Training can be provided by your Account Manager, along with support from the Pinpoint Team anytime on 1300 728 882.
