

December Christmas Release

Saturday 13th December 2014

Release Summary

- Engine Hours has been standardized to decimal hours for all engine hour and service reports.
- Speed Exception can now be generated with gazetted speed limit.
- Name of Weekly and Monthly Operations have changed to 'Operations Report'. This report can now be run based on user selected dates up to 31 days.
- Weekly Operation with sensor is now called 'Operations with Sensor'. User can define start date range for up to 7 days.
- Weekly Operations with Zone is now called 'Operations with Zone'. User can define start date range for up to 7 days.
- (NOTE: Scheduled reports will be unaffected by name changes)
- New Weekly Operation report with Zone and Sensor.
- New Zone report with sensor.
- Reports Legend has been updated
- Smart Locator reports will open automatically after Export function.
- Smart Locator. Routes can now be created and edited based on an all activity quick report. These routes can then be allocated to a vehicle for route navigation. (requires MDT1745)
- Performance improvement when saving geo-fences.
- Numerous bugs have been squashed.

Engine Hours

Engine Hours has been standardized to decimal hours for all engine hour and service reports.
